

**ROTAREX**  
FIRETEC

 **DIMES**<sup>®</sup>  
DIGITAL MEASUREMENT SYSTEM  
BETTER FIRE SYSTEM CERTAINTY

## IMPROVES CERTAINTY OF SYSTEM READINESS

**Digitally monitors cylinder contents 24/7**

**Proactively warns in the event of a leak or problem**

## A DIMES SOLUTION FOR INERT GAS & CO<sub>2</sub> AGENTS

**INERT GAS**

**CO<sub>2</sub>**

## REDUCES OPERATING COSTS

**Easier/faster maintenance:**

- ★ Interventions needed only when the system sends a warning signal
- ★ Visually verify cylinder contents at a glance with greater accuracy than pressure gauges
- ★ Eliminates need to periodically dismount / weigh cylinders to verify contents (CO<sub>2</sub> systems)

**Saves time & money over the useful lifetime. The acquisition cost pays out quickly.**

# INERT GAS

## Single & multiple cylinder configurations

## DIMES: HOW IT WORKS:

The DIMES Sensor unit replaces the standard pressure gauge on the valve port (M10x1 connection).

Built-in sensors continually monitor cylinder pressure and ambient temperature.

An integrated processor calculates the exact cylinder contents using the algorithm of the known relationship between pressure and temperature for each specific inert gas mixtures: IG100, IG01, IG55 and IG 541.

The system can be programmed to send a warning alarm when the pressure drops below a level that you determine – such as in the event of a leak or when the system discharges.

### STANDARD PRESSURE GAUGES

### DIMES SYSTEM

DIMES replaces passive pressure gauges for more accurate and pro-active monitoring as well as secondary functionalities.

# CO<sub>2</sub>

## Single Cylinder

DIMES valve + control box connection cable

## Multiple Cylinders

DIMES valve + multiple cylinder connector cable + control box connection cable + end connector

## HOW IT WORKS:

The DIMES sensor units is integrated into a special valve with an linear electrode. This replaces the standard system valve.

The built-in sensors monitor ambient temperature and the capacitance differential of the gas density between two electrodes in the dip tube.

An integrated microchip calculates the exact cylinder contents based on the known densities of CO<sub>2</sub> gas at different ambient temperatures. You input the cylinder volume and 100% fill level during a simple one-time configuration when the cylinder is filled.

If the contents would ever fall below a pre-set level, such as in the event of a leak, a warning signal will sound via the control box. A warning signal is also sent when the system discharges.

# DIMES MONITORING SOLUTIONS

## MONITORING SOFTWARE AVAILABLE

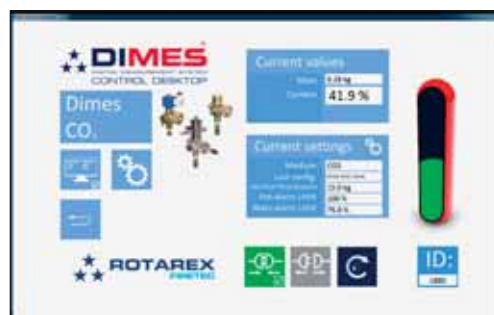

Special software is available to easily configure and monitor the contents of the DIMES system. Calibrates and track the key parameters needed for the algorithm to calculate the exact extinguishing agent level.

**Easy, Intuitive design**

**Runs on any laptop**

### Key inputs:

- ★ Cylinder Volume
- ★ Gas type
- ★ Pre-set warning level

# A FULL LINE OF GAS CONTROL SOLUTIONS

## COMPLETE SOLUTIONS FROM SOURCE TO PROCESS.

ROTAREX is helping engineers worldwide to get better gas results: from ultra high purity production and medical care facilities to industrial and LPG applications, as well as alternative energy vehicles, fire suppression, diving, aerospace, cryogenics, laboratory, petro-chemical and welding. ROTAREX applies over 90 years of know-how and experience to custom design, develop and manufacture the high performance valves, regulators and fittings to suit your needs, all in one hand. Discover the difference ROTAREX can make in your world.
